

## Enterprise profile

The mixxt GmbH is a provider of innovative social network solutions and operator of the European community platform [www.mixxt.com](http://www.mixxt.com), where everyone can create her or his own community. mixxt simplifies communication and organisation and makes them more efficient.

Community hosts can directly get in contact with their customers or target group and present themselves interactively and innovatively without abandoning privacy, structure or the own design.

The name mixxt plays with the term “mixed”. On our platform, people from different countries, cultures and interests share multimedia works, interact and create new contents. That’s why our claim says that we are “connecting cultures”.
